

TURNING MEDICAL IMAGES INTO LIFE-CHANGING INSIGHTS

Company Overview Every day we strive to make a difference in the lives of patients and the physicians caring for them. Imbio, LLC is a leader in machine learning and AI powered medical image analysis that changes the way patients with pulmonary conditions are identified, diagnosed and treated. Our initial products are regulatory cleared in the U.S. and Europe with a robust pipeline of algorithms designed to become the leading AI analysis suite for pulmonary care. We build and value relationships with renowned academics as well as global pharmaceutical and medical device companies to inform our strategy, source technology, and partner in bringing Imbio breakthroughs to daily care.

As a team, we value creativity, drive and teamwork with uncompromising integrity and a sense of humor. If you are passionate about using your talents to make a difference, please contact us at careers@imbio.com.

Software Test Engineer Job Description:

At Imbio, we strive to produce software that is high quality and robust. The Software Test Engineer is an integral part of this focus. Successful applicants will have a passion for testing software in a collaborative environment, while having the self-motivation to work effectively independently.

Responsibilities:

- Meeting with development managers to discuss software specifications and ensure changes are testable.
- Designing manual and automated test procedures to evaluate each software product's conformance to documented requirements.
- Coding automated test procedures and ensuring their validation
- Investigating, logging and tracking bugs to determine root cause and improve test procedures accordingly.
- Collaborating with Software Development and DevOps teams to improve and maintain automation framework.
- Executing tests and generating test reports to support software releases.

Skills:

- Direct experience in full-cycle QA: test planning, test designing, test scripting and execution.

- Overall 3+ years of experience in Software Quality Assurance, preferably in medical, financial, or similarly regulated industry.
- Clear, concise, and persuasive written and verbal communication skills.
- Demonstrated experience with presenting best practices to internal audiences.
- Experience with/knowledge of Jenkins, CircleCI, AWS
- Hands-on experience coding automation in Robot, PyTest, Selenium.
- Proactive relationship management with the Software Development team.

Compensation: Imbio offers competitive salary, full benefits including health, dental, life & disability and vacation, and a flexible work location. To learn more about Imbio, please visit www.imbio.com.
