Disclaimer: This report neither constitutes, nor replaces a radiological analysis. The medical and legal responsibility with respect to the diagnosis and choice of therapy remains solely with the responsible physician. Analysis by Imbio.

The EMPROVE criteria is defined as emphysema (% -920 HU) $\geq 40\%$, fissure completeness $\geq 90\%$, and emphysema heterogeneity between ipsilateral lobes $\geq 10^1$.
¹Criner GJ et al. Am J Respir Crit Care Med. 2019 Dec; 200(11):1354-1362. doi: 10.1164/rccm.201902-0383OC.
